DETAILED ACTION

Allowable Subject Matter

1. Claims 1-29 are allowed.

Reasons for Allowance

2. The following is an examiner's statement of reasons for allowance:

The primary reason for the allowance of claims 1-4, 6, 8, 12-23 and 26 is the inclusion of the limitation that said chamber comprises free spaces on opposite sides of the string tension head that allow for free movement of the portion between the string tensioning head and the feed aperture and the portion between the string tensioning head and the fixing point, wherein the free spaces extend along a direction of movement of the string tensioning head and allow for the free movement of said portions of the string during movement of the string tensioning head within the chamber. It is this limitation found in each of the claims of the instant application, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for the allowance of claim 5 is the inclusion of the limitation that the guiding body comprises oppositely arranged slot-shaped recesses, wherein the slot-shaped recesses accommodate movement of the portion and allow for free lateral movement of the at least one tensionable string between the string tensioning head and the feed aperture and between the string tensioning head and the

fixing point. It is this limitation found in the claim of the instant application, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claim 7 is the inclusion of the limitation that the at least one guiding sleeve comprises oppositely arranged slots which accommodate the portion. It is this limitation found in the claim of the instant application, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes this claim allowable over the prior art.

The primary reason for the allowance of claims 9-11 is the inclusion of the limitation that at least one slot is formed on an end of the instrument body, wherein the at least one slot communicates with the chamber. It is this limitation found in each of the claims of the instant application, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 24 and 27 is the inclusion of the limitation that guiding recesses are arranged on opposite sides of each string tensioning head, the guiding recesses extending along a direction of movement of the string tensioning heads, and wherein the guiding recesses guide movement of the end areas of the strings during rotation of each rotatable tuning mechanism. It is this limitation found in each of the claims of the instant application, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

The primary reason for the allowance of claims 25, 28 and 29 is the inclusion of the limitation that guiding slots are located on opposite sides of each string tensioning head, the guiding slots extending along a direction of movement of the string tensioning heads, and wherein the guiding slots guide movement of the end areas of the strings during rotation of each rotatable tuning mechanism. It is this limitation found in each of the claims of the instant application, as it is claimed in the combination that has not been found, taught or suggested by the prior art of record, which makes these claims allowable over the prior art.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
